

DATE: November 4, 1991
TO: Terry Kakida, EAD
FROM: David Flores, Property Management
SUBJECT: Environmental Testing and Assessment

As discussed in our recent meeting, Property Management requests an assessment for hazardous materials, including asbestos and ground water contamination at City Light's First Hill Substation. The assessment should test both the site and structure. The substation is located adjacent to the Seattle University campus on 11th and Cherry. It is our understanding that this can be completed by late January 1992.

Your cooperation and expediency in these matters will be appreciated, and should you need further information or assistance, please call me at 684-3337 or June Jacobson at 684-3324.
